Cement Australia Post Set Concrete is a proportioned blend of cement, aggregate and sand for use in projects where a non-structural concrete is required.

Post Set Concrete is part of our 'Just Add Water' range and is specifically designed for fixing fence posts, clotheslines, letterboxes and other non-load bearing posts into the ground.

## HOW TO USE

**STEP 1** Place the post in the hole and provide support so that it does not fall over.

Note: The hole should be pre-wet to limit the absorption of water from the Post Set Concrete mix.

**STEP 2** Place Post Set Concrete in a wheelbarrow, create a hollow and add clean water according to the bag instructions and mix thoroughly to achieve a workable mix.

**Too much water ruins good concrete.**

**STEP 3** Place mixed Post Set Concrete in the hole, compact it using a steel rod or similar to tamp the concrete to remove any air, and leave to set.

Supports should be left for 24hours.

## SPECIFICATIONS

Approximately 2 x 20kg bags per post hole.

## HOW MUCH DO I NEED?

Visit [cementaustralia.com.au/calculators](http://cementaustralia.com.au/calculators) to use our handy product calculator to work out how much Gap Sand you need for your project.
